

Combination agreements

When combining R82 product with other product

The combination must not change the intended purpose of either products or modify the products in such a way that compliance with the applicable requirements may be affected. The combiner of the products must ensure, that applicable requirements are fulfilled. Applicable requirements examples: alignment of user weight/mass of the combined seat and base, approval for transportation in vehicles of both products (ISO16840-4 for seat and ISO7176-19 for base), material safety (biocompatibility, flammability), mechanical safety (stability, squeezing hazards, inter connection), electrical safety. The maximum user weight for the combination is always the same as for the product in the combination that has the lowest maximum user weight.
