

Etac Edge, Smart, Easy

Shower stools

 **etac**[®]

Shower stools to rely on

Sitting down while showering, or performing other activities in the bathroom, is an easy way to avoid fall accidents. Etac offers a wide range of shower stools designed to assure maximum comfort and safety.

The single most important feature in a shower stool is stability. Etac models Easy, Smart and Edge have sturdy legs that are angled outwards to maximize stability regardless of height. They are all equipped with unique ferrules that adapt to uneven surfaces and provide stable support against wet floors. The shower stools are also thoroughly tested in accordance with European and international standards and have max users weights of 200kg (Easy & Smart) and 130 kg (Edge).

A shower stool for every need

The Etac range of shower stools includes a variety of shapes, heights and colours and offers solutions to most user needs.

With its classic rounded seating area, the Etac Easy suits many needs and environments. Regardless of the position of the stool, it's easy to sit on it.

The rectangular seat of Etac Smart can be used from different sides. One offers a wider seating area and the other a narrower one. The corners make it easy to straddle the seat for extra stability.

With its smart, triangular design, Etac Edge fits well in smaller spaces or shower corners. Users can straddle the seat for increased mobility. Another option is to lower one leg slightly and straddle the seat over this corner. This way the seat angle opens and can relieve an aching hip.

Etac Smart and Easy are also offered with swivel pads for increased mobility. The pads enable turning without any friction. They are also water resistant, heat reflective and have a non-slip surface.

Colour variants

Etac shower stools are available in three different colours. Grey, blue and white. All to give the user great options and possibility to match the shower stool with the rest of the bathroom

At Etac, products are designed with safety, hygiene and sustainability in mind. They have an estimated lifetime of 10 years, if handled according to instructions. They also come with a 5-year warranty.

Features

Stable

The legs of the stools are angled outwards for increased stability. Responsive, non-slip ferrules adapt to the floor and provide stability on wet and uneven surfaces.

Comfortable and safe

Generous seating areas with softly rounded shapes and a non-slip surface make sitting comfortable and safe. Special perforations allow excess water to quickly drain away.

Height adjustable

It's easy to adjust the height, just click and press. The oval shape prevents the telescopic legs from turning when making the adjustment. There are no loose parts to misplace.

Easy to assemble

The shower stools come in practical, flat packed, carrycases and are quickly assembled without the need for any tools. The push button lock function makes it easy to fit the legs.

Accessories

Seat pad:

For extra comfort and warmth a soft seat pad can be added. It snaps onto the seat and can be wiped dry after usage.
