^ Flip-Up Armrests and Hardware required.
 *Highly recommended for users weighing 50lbs or less.
¹ Manufacturer Installation Required.
² Anti-tip Tubes Required

The Rodeo Transit option includes four manufacturer installed red wheelchair transportation anchors. The Rodeo Transit model has been crash tested and conforms to RESNA WC19 standards. Anthropomorphic Test Device weights are RD10T, RD12T 66lbs/30kg, RD14T 100lbs/45kg, and RD16T 140lbs/64kg.

The Convoid Rodeo Mobility Base was tested with the Rodeo Seating Module, equipped with a head support and wheelchair-anchored 2-point pelvic lap belt. Do not use the foot positioners on the Convoid Rodeo during transit in a motor vehicle. The performance and safety of accessories and/or other seating options not tested by Convoid is unknown, and no warranty or claim about their performance is or can being made.

It is Convoid's position that the wheelchair user should be transferred from the wheelchair into appropriate vehicle seating whenever possible. Please note that at this time, the Department of Transportation has not officially approved any tie-down system for a user while in a wheelchair, therefore Convoid cannot recommend a transit system.

The WC19 standard is specifically designed for the wheelchair to be secured in a forward facing configuration and not in any other direction. For more information on RESNA WC-19 and WC-20 standards please visit <http://www.rercwts.pitt.edu/WC19.html>.

HCPCS codes are provided for your convenience and are NOT to be considered billing or legal advice. Providers are responsible for insuring that appropriate billing codes are used when submitting claims. Proper use of HCPCS codes does not insure coverage or payment. Contact the appropriate payer for coverage information.
